

QD Laser, Inc. will exhibit at Photonix 2020 – 20th Int'l Laser & Photonics Expo on December 2020 in Makuhari Messe.

We are planning to show high-performance semiconductor lasers and high quality quantum dot/quantum well wafers on GaAs platform for datacom and industrial application.

Exhibits

532-594nm compact visible lasers for biomedical equipment

640nm-940nm FP Lasers for various sensor

short pulsed 1064nm DFB lasers for seeder of fiber lasers

Quantum dot lasers for Si photonics

High quality epitaxial wafers.

New products: 4 wavelength multiplexing module/Triplexer compact module

Photonix 2020 – 20th Int'l Laser & Photonics Expo

Dates: December 2~4, 2020

Place: Makuhari Messe, Chiba, Japan

Booth # 3-26

We will also exhibit online, so please come to the virtual booth if you cannot visit our booth.

Pre-registration is required for online visits. Please register from the official website of this exhibition. https://www.material-expo.jp/en-gb/lp/online_tokyo.html

What you can do at the virtual booth are as follows;

Download materials / Meeting by video call / Apply for appointment, etc.
