

OPIE'21 Laser EXPO June 30~July 2, 2021 at Booth# A-34, Pacifico YOKOHAMA

QD Laser, Inc. will exhibit at OPIE' 21 Laser EXPO in Yokohama in June 2021.

We plan to show high-performance semiconductor lasers and high-quality wafers using quantum dot/quantum well structures on the GaAs platform for datacom and industrial applications.

Exhibits:

532-594nm compact visible lasers for biomedical applications

640nm-940nm FP Lasers for sensing applications

Short pulsed 1064nm DFB lasers for material processing

1310nm Quantum dot lasers for Si photonics

High-quality epitaxial wafers

Four wavelength multiplexing module with 405, 488, 561, and 660nm for biomedical equipment

OPIE' 21 Laser EXPO Exhibition

Dates: June 30~July 2, 2021

Booth # A-34
